

Press release. ALIENO unveiled the GEN 001 electric hyper SUV, which is the first of an upcoming series of concept (GEN) models.

16.01.2024, Bulgaria (Last updated: 18.01.2024).

The Bulgarian developer and manufacturer of electric hypercars, ALIENO, unveiled the GEN 001 electric hyper SUV.

It is the first of an upcoming series of concept models, with which ALIENO aims to cover different design styles, thus enlarging the reach and potential customers, offering a car for each individual taste.

All of them will be designated as a GEN series by name, followed by a number equal to their consecutive unveiling number, and after their production, will get a more attractive individual model name.

The name of the series is derived from the Latin words "gen / gene" and "genesis", which mean "gene" and "genesis / origin / creation / beginning".

All ALIENO concept (GEN) models can be produced on request, with interest expected to range from single units to small series.

This is possible, because the ALIENO GEN 001 and the upcoming other GEN series concept models, are based on the basic ALIENO technologies and modular design developed for ALIENO's debut ARCANUM and UNUM electric hypercar models, which in their most extreme packages, versions and modifications have a power of 5221 hp, a torque of 8880 Nm, a maximum speed of 584+ km/h (363+ mph) and a power-to-weight ratio of 2.64 hp/kg.

Furthermore, ALIENO actively develops and uses artificial intelligence (AI) and other innovative technologies for design, development and production in all key stages of the creation of the hypercars, therefore it is able to design and manufacture any shape and detail imaginable.

In addition, there is great progress in the construction of the ALIENO factory located in Tuhovishta, Bulgaria, where the initial 2300 square meters of mobile halls have already been built, in which the first dozens of production machines are installed in production mode.

All this allows for a drastic acceleration of the production of the first ALIENO prototypes.

At this initial stage, the ALIENO factory is located on an area of nearly 15 000 square meters, and to put into production mode all the necessary hundreds of production machines, the majority of which have already been delivered, ALIENO is in the process of building for them of a huge specialized production halls with a total built-up area of about 12 000 square meters. They will carry out the initial production of the ALIENO hypercars, which we currently expect to see on the road no earlier than 2025 - 2027.
